HPPL provided advice on alternative access during construction/operations, which was acknowledged by KNAC representatives. • Importance of water including cumulative impacts to downstream values. HPPL provided an overview of water demand from projects in the region showing Round Hill's relatively small additional demand. HPPL will provide monitoring data for Round Hill and share with other proponents. • Landforms at closure including request for pit backfilling. HPPL commits to further investigating potential for backfilling within the mine plan. Further detail & updates to be provided during Mining Act approvals application processes i.e. MDCP and MCP. • Proximity of accommodation camp to highway. HPPL will continue to investigate locations further from the highway noting constrained Development Envelope. General support for the project pending HPPL response on above items.
