Chris Adams
Chief Executive Officer
City of Karratha
PO Box 219
KARRATHA WA 6714

5 July 2018

Dear Chris,

City of Karratha – Dampier Palms sand renourishment trial

This letter is to confirm Rio Tinto's in-principal support for the *Dampier Palms Sand Renourishment Trial* (Project) as proposed by the City of Karratha (City).

The site where the Project will take place is a portion of Hamersley Iron Crown Lease Lot 23 and Lot 38, and locally referred to as the Palms Beach.

Please refer to the executed ***Dampier Townsite and Foreshore Enhancement - Access and Indemnity Agreement*** (attached) between the Parties that outlines the responsibilities of the City to undertake the Project, specifically ***Clause 2 Grant of Access for Enhancements*** and ***Clause 5 City Obligations***. The City is to provide a current Scope of Works to Rio Tinto and ensure that all licences and permits are in place and compliant with legislation during the life of the project.

The City and Rio Tinto have had strong communication and we would request that this level of communication is maintained throughout the Project, including the development of a community communications plan to support the delivery of the Project.

Rio Tinto will provide endorsement to proceed with the Project once the City can demonstrate all the necessary approvals are in place.

Yours sincerely,

Shontay Cardew
Superintendent – Community Engagement Coastal
Rio Tinto
