**RE: LETTER OF SUPPORT - ENGIE and YARA renewable hydrogen and ammonia project application to ARENA Renewable Hydrogen Deployment Funding Round**

To whom it may concern,

We are pleased to express our support for ENGIE's application to ARENA's Renewable Hydrogen Deployment Funding Round for the renewable hydrogen and ammonia project on Murujuga ("YURI Project").

Murujuga Aboriginal Corporation (MAC) enjoys positive and supportive relationships with Yara Pilbara, ENGIE's partner in YURI Project, and has also had positive engagement with ENGIE during their visits to Murujuga.

MAC's mission is to bring the Aboriginal parties whom we represent together to speak with one voice and to work together in solidarity to achieve positive economic outcomes for the contemporary Murujuga community and its future generations. Indications are that YURI Project presents the potential for economic opportunities as we explore different avenues for partnership with Yara and ENGIE.

In addition, MAC's mission includes the preservation and protection of our landholdings for future generations, so the fact that YURI Project presents an opportunity to develop emissions-free industry is one we value highly.

MAC believes that YURI Project presents an opportunity to develop a world-leading approach to developing a new renewable industry in partnership with local Aboriginal people. Your support for the Project would be greatly appreciated.

Kind regards,

**Peter Jeffries**  
Chief Executive Officer
